SKILLS

aws (beanstalk, rds, lambda, sns, sqs ...), docker

javascript, typescript, node.js, react, express, hapi.js, nest.js, next.js, mongoose, prisma, knex, sentry, new relic, serverless framework....

sql, mariadb, mongodb, redis, sybase, sybase iq, sqlite...

java, servlets, jsp, tomcat, jetty, patterns...

spring, spring boot, spring mvc, spring security, spring data, spring cloud...

ABOUT ME

Hi, my name is **SVIATOSLAV LEBEDIEV**, and I'm a Lead Software Engineer. I'm specialized in developing both frontend and backend. Now I'm more interested in javascript/typescript development (node.js, react, nest.js, hapi.js, next.js, aws...). I have experience in the development of different types of projects from scratch. I like to follow the latest trends in programming, especially in javascript/typescript, and use their new features in my projects.

EMPLOYMENT

2021 - Present

UPNEXT

[Software Engineer](#)

2019 - 2021

N-IX

[Lead Software Engineer](#)

2018 - 2019

REDTAG

[Full Stack Engineer, Team Lead](#)

2016 - 2017

N-IX

[Software Engineer](#)

2007 - 2016

PrivatBank

[Senior java/javascript developer](#)

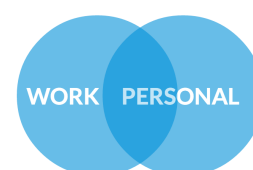

2004

Dniprodzerzhynsk State Technical University

[Developer](#)

INTERESTS

[javascript](#)

node.js, typescript, prisma, ionic, kubernetes, graphql, react, redux

[sport](#)

volleyball, table tennis, jogging

LAST PROJECTS

Brief.news

Daily briefing, powered by AI

Responsibilities: backend/frontend development, architecture,...

Technologies: nest.js, typescript, openai, llm, postgres, next.js, gcp...

Upnext

A powerful reader, enhanced with AI

Responsibilities: backend/frontend/mobile development, architecture,...

Technologies: nest.js, typescript, firebase, postgres, react native, next.js, gcp...

Locker

An integration platform for lockers and clients. Allows to collect, process and react to different events from locker system and integrate it with customer API. Provides APIs for lockers and customers.

Responsibilities: architecture design of the whole system, development coordination of the different parts, backend development, set up of the required flows/DevOps, team management

Technologies: typescript, lambda, serverless, sns, sqs, route 53, api gateway, hapi.js, joi, mongodb, aws beanstalk, docker, jest, gitlab-ci...

Avast SafePrice [more info](#)

The FREE browser add-on that gets you a better deal

Responsibilities: backend/frontend development, team management, coordination between Ukrainian and USA teams

Technologies: jersey, google cloud, node.js, jest, junit, react, redux, rxjs, jss, redux-observable

Link

A proxy system between our customers and self-checkouts. Allows to fetch data from different sources and send it to checkouts and proxy receipts back.

Responsibilities: architecture design of the whole system, development coordination of the different parts, backend development, set up of the required flows/DevOps, team management

Technologies: typescript, hapi.js, joi, aws postgresql, aws beanstalk, docker, jest, gitlab-ci

Hotschedules.com

HotSchedules is the industry's leading online employee scheduling software, reducing the time it takes managers to create, communicate, and manage employee work schedules.

Responsibilities: frontend development, architecture design for 'react' migration

Technologies: spring, spring jdbc, microsoft sql server, flyway, gradle, xsl, hazelcast, junit, react, redux, sass, marionette.js

Bus tickets bilet.privatbank.ua/tbus

Responsibilities: architecture design, technologies selection, development

Technologies: angular, angular ui, lodash, grunt, bower, sass, jquery, karma, ng-describe

Train tickets bilet.privatbank.ua/train

Responsibilities: refactoring, development of new features, integration

Technologies: backbone, bootstrap, grunt, bower, sass, jquery, underscore, karma

Bonus+ API

Rest api for receiving a bonus percent when a client buys something with a card

Responsibilities: architecture design, technologies selection, development

Technologies: spring boot, spring security, sybase ase

Operator's desktop

It's a web-application which allows the PrivatBank incoming service to receive and process client's calls. Operators can block cards, send SMS, create new card requests, etc.

Responsibilities: architecture design, technologies selection, development

Technologies: spring mvc, spring security, angular.js, mysql, grunt, karma

PBCom

This is a web application the aim of which is to replace skype inside PrivatBank. It allows to send messages, files, make phone and video calls.

Responsibilities: architecture design, technologies selection, development

Technologies: spring mvc, spring security, spring data, mongodb, backbone, grunt, karma, etc.

JDBox

This is an alternative to Squirrel SQL Client which is developed to be used for routine tasks in PrivatBank.

JDBox's functionality can be extended through the use of plugins.

Currently it has 3 plugins : Sql Editor, DBF editor, JDBC Mover.

It allows to import/export data from/to database in several formats : xml, xls, json, dbf, etc.

Responsibilities: architecture design, technologies selection, development

Technologies: swing, jpf, guava, miglayout, ehcache, etc.

poems.net.ua

I like poems, that's why I decided to create this site.

It was just a "weekend" project. Now there are over 17000 poems there.

Responsibilities: backend/frontend development

Technologies: node.js, express, swig, mongodb, gumby, query, grunt

Analysis

It's an analytical complex for creating reports for National Bank of Ukraine. Economists of PrivatBank also use it for execution of different analytical tasks.

Responsibilities: backend/frontend development

Technologies: servlets, filters, jsp, sybase iq, stored procedures, jquery, etc.

Skype client

It's an alternative skype client built on skypekit. The application allows to send messages, files and make video calls. Also the application contains SIP client.

Responsibilities: architecture design, technologies selection, development

Technologies: swing, skypekit, ehcache, miglayout, sqlite, h2
